**Zoology**
In the Zoology minor students investigate the behavior, ecology, and physiology of animals. Students then focus on an aspect of animal biology that fascinates them ranging from particular types of animals, such as in ornithology, to how animals work, such as through cell biology or genetics.

---

An academic minor is a specified sequence of courses totaling 18 to 24 credits and requiring at least nine credits of 3000 or 4000 level work. Twelve of the credits must be outside of your major degree requirements. Students are limited to declaring one minor in addition to their major(s). Minors do not lead to a degree. No substitution or waiver of courses in a minor is allowed. The college does not guarantee courses for a minor.
