

ENVIRONMENTAL BIOLOGY

Following is some general information about resources and tools to assist researchers in the field of Environmental Biology. This list is just a sampling of what the Quimby Library has in its collection.

FINDING BOOKS

The library's holdings are best accessed through Minerva, our online catalog. This system can be searched by author, title, subject heading, or key word. Help in using the system is available online and at the reference/circulation desk. The library catalog [<http://minerva.maine.edu/search~S96>] can be accessed from the library as well as your home or office via the internet.

The library holdings are arranged by the Library of Congress Classification system and uses Library of Congress subject headings. Examples of possible subjects include:

Adaptation (Biology); Anatomy; Animal behavior; Animals – Physiology; Biodiversity; Biogeography; Biologists; Biology; Biology – Authorship; Biological illustration; Biology, economic; Biology, experimental; Biometry; Birds – Physiology; Cells; Conservation biology; Cytology; Death (Biology); Desert biology; Developmental biology; Ecology; Environmental health; Estuarine biology; Evolution (Biology); Fishes – Physiology; Freshwater biology; Geobiology; Genetics; Human biology; Life (Biology); Limnology; Mammals; Marine biology; Molecular biology; Natural history illustration; Ornithology; Physiology; Plant cells and tissues; Plant physiology; Population biology; Report writing; Scientific illustration; Seashore biology; Space biology; Stains and staining; Technical writing; Trees – Physiology; Variation (Biology); Woody plants – Physiology; Zoology
