---

**OBJECTIVE:** Employment at National Wildlife Foundation, Grizzly Bear Protection Project in Nome, AK.

**EDUCATION:** Unity College, Unity, ME  
Bachelor of Science Ecology, Minor Wildlife

Graduated May 2007  
GPA 3.4

## **EXPERIENCE:**

**Piedmont Wildlife Center, Durham, NC** Summer 2006

*Rehabilitation and Education Intern*

- Administered oral medications and kept accurate records of dosage/time
- Trained to maintain quarantine, educated on protocols, cared for songbirds and turtles in quarantine area
- Followed set guidelines to measure appropriate amounts of food for reptiles and birds (songbirds, raptors, waterfowl)
- Daily fed and cleaned cages for approximately twenty turtles and sixty songbirds
- Trained volunteers to care for box and water turtles and to safely feed adult and baby songbirds using syringes

**Hack Box Attendant and Researcher** June – August 2004

*Maine Inland Fisheries and Wildlife ~ Endangered Species Division, Bangor, ME*

- Responsible for daily operations including feeding, handling of various species
- Cared for 23 introduced Peregrine Falcons in remote areas of northern Maine
- Observed falcons using spotting scopes after canoeing and hiking over 30 miles into several different remote locations
- Kept detailed field logs for 3 months worth of observations

**Volunteer Eco-Guide** June – August 2003

*The Reptile Emporium, Caratunk, ME*

- Worked as assistant to site manager, was responsible for cleaning cages and handling reptiles
- Provided interpretive talks for walking tours through emporium.

## **SKILLS & TRAINING:**

- 2 years of strong identification and classification of wildlife as well as native plants
- Strong field journal, record keeping skills, and sampling skills
- 5 years extensive backpacking, camping, canoeing, hiking experience
- 3 credit course in firearm use
- 3 credit course in large machinery operation and small engine mechanics
- 1 day specialty training course in chainsaw safety
- 3 months training in care and husbandry of 4 different species of reptiles and amphibians

## **RELEVANT COURSEWORK:**

***Wildlife Techniques*** - Practiced bird and mammal capture techniques, sexing and aging, radio telemetry, food habits analysis, habitat assessment and manipulation, home range estimation, survival estimation, and population estimating techniques.

***Ornithology*** - Studied bird evolution, the avian physiological system, flight dynamics, and avian ecology. Wrote research paper on habitat needs of peregrine falcons.

***Wildlife Ecology and Management*** –Learned about the different interactions of wildlife, the environment, and humans from a biological, ecological, economic, political, and social perspective.

***Other Relevant Courses*** – Systematic Botany, Ecology and Advanced Ecology, Marine Biology, Oral Communication, Perspectives on Nature and the Environment, Environment Plant Physiology.
