

Organization: The National Aquarium (AZA Member)

Location: Baltimore, Maryland, United States

Job or Internship: Job

The National Aquarium in Baltimore is looking for a Conservation Technician I to aide in the implementation of the Chesapeake Bay Initiative, aide in the implementation of the Wetland Nursery Program and provide technical and clerical assistance to the Conservation Department.

A Conservation Technician I will execute technical aspects of conservation projects including environmental restoration and monitoring activities, manage school program participation and present classroom activities for the Wetland Nursery Program and plan and implement outreach activities including volunteer coordination.

Requirements of this position include a Bachelor's degree in environmental science or related field with a strong background in wetland ecology, or equivalent experience; informal or formal teaching and field experience a plus. Proficient clerical skills, aptitude for various environmental monitoring techniques and the ability to translate basic ecology and biology knowledge to volunteers and students is required. Some evening and weekend work required along with some travel, a valid driver's license required and SCUBA certification is desirable.

Please apply online at www.aqua.org.
