

Environmental Planner III

Bismarck ND

Requirements

A Masters degree is preferred. A Bachelors degree in environmental studies, natural resources, or a related field from an accredited four-year college or university and 10+ years of experience is required. Previous experience with a consulting firm in project management, policy and regulatory planning, and NEPA expertise is preferred. The individual must interact with people at all levels and communicate effectively. Strong computer skills, detail-oriented, self-starter, leadership, organizational, and interpersonal skills are essential. A valid drivers license if required.

Job Description

The Environmental Planner III leads, plans, and reviews projects. This includes providing timely, accurate, and cost efficient professional environmental planning, project, and management services in the office and in the field for both KLJ internal practice areas and external clientele. This individual will direct, coordinate, and supervise environmental staff. Duties and who this individual reports to will fluctuate between projects, Practice Areas, and offices.
