McEnroe Organic Farm 2012 Internship Program

About the Farm:

McEnroe Farm is a NOFA-NY LLC certified organic farm producing compost and soils, organic and naturally raised meats, greenhouse tomatoes, seasonal produce and nursery transplants. The soils and compost are approved for organic production and have been used by farms, gardens, landscaping projects, and green roofs since 1987. A unique, bio-diverse farm, we adhere to organic principles of caring for the soil and being stewards of the earth. We farm over 1000 acres in Northern Dutchess county of New York State.

Interns learn all aspects of the farm. One intern will be hired with a livestock focus. Additional interns will focus on vegetable production and green markets.

Please visit our website for information on the farm: mcenroeorganicfarm.com
